Description of course (content):		Knowledge of law and legal regulation of business. The program is explained through units dealing with the basic categories of law and the state, object and subjects of business law, valid and unreasonable legal works, contractual relations - contracts, the right of commercial companies, types of companies and enterprises banking, banking, industrial property and securities.	
Evaluation method:		The question will be more in writing. Their formulation will be made from the teaching material taught in the hall and their form will be combined (optional and short questions in the form of essays). Assessment method: <ul style="list-style-type: none"> • Development and introduction of seminar paper, 	

		<p>10% of final grade;</p> <ul style="list-style-type: none"> • Two tests represent 90% of the final grade. • The first test includes 45% of the teaching material; • The second test includes 45% of the final grade. <p>Therefore, if you pass two tests, and if you are regular and active in the lectures, and if you are conducting the seminar, you do not need to undergo the final test.</p> <p>If the student fails to undergo one of the tests then he/she will be subject to the final exam. Also, students who have participated in both tests and who have not accumulated 51% of the points and students who are not satisfied with the result achieved during the semester should undergo the final exam.</p> <p>Final test: To pass the test, students must reach at least 51% of the predicted points.</p>
Learning outcomes:		<p>At the end, students will be able to understand:</p> <ul style="list-style-type: none"> • Role and function of the state and the right in general in the socio-economic life and concretely in the field of business regulation; • Types, power and effect of social norms related to the legal system; • Combination and arrangement of the economic law system regarding the conducting of business entities and implementation of legal norms in practice; • Sources of liabilities with particular emphasis on the structure and types of business contracts; • Business enterprises, their types, institutions for the possibility of their registration and termination, and legal acts of enterprises, contracts and types of contracts etc. • The Intellectual Property Right System - Industrial Law, Copyright and Related Rights
